Start Objective

The initial objective of the project is to create the foundation of the mobile application, which would support the needs of Cal State LA students. Key goals include:

- Helping students achieve academic success by supporting their mental, physical, and financial needs.

- Designing the user interface structure for the mobile app.

- Establishing the resources and mental wellness tools within the app.

- Estimating the scope of Pacific Clinics' work and how the app will extend their support.

1st Checkpoint Objective

The primary objective of Snapshot 2 is to define the app's features and convert planning into working components. New goals include:

- Implementing PHQ-9 and GAD-7 mental health assessments.

- Creating a prototype layout for the chatbot screen and resource hub.

- Establishing the app's navigation structure.

- Refining the project's direction based on user surveys.

2nd Checkpoint Objective

The primary objective of Snapshot 3 is to build on previous work by incorporating more functionality. New goals include:

- Expanding mental wellness features, such as with mood check-ins.

- Implementing backend logic in AWS and Cloudflare for data storage.

- Developing the chatbot's prompting structure to include safety responses.

- Improving the user interface based on feedback.

Due Date Checkpoint

The primary objective of Snapshot 4, or the Due Date Checkpoint, is to refine the application to ensure it is stable and runs without errors. New goals include:

- Finalizing core features such as chatbot interaction, quizzes, and helpful resources.

- Identifying bugs and usability issues, and fixing them.

- Improving visual components, such as user interface adjustments.
